

Idea behind the song.

This song I wrote is a point-of-view piece of how I imagine the builder of the Göbekli Tepe was thinking. This was also written with the memories of finishing the minor project, still fresh in my mind. The chorus is the nearest analog of how I felt when helping with the minor project.

How was the beat made?

The beat was made with sounds of objects found in my studio. Sampled and sequenced in Ableton Live.

Lyrical break down.

Chorus:

this is a direct analog to how I felt when I helped build the DAT minor project and honestly where I got the inspiration to write the song in the point-of-view of the builder of the Göbekli Tepe.

Verse 1:

1st half of the verse is how I understood the topic of metaphysics. Where the early humans started to believe in a power higher than their own.
2nd half is where he realized this project is going to help bring his community together and not for his own sake but for the sake of all.

Verse 2:

verse 2 generally doubles down on the community aspect of how iconography can help build connections between the people and reinforce the sense of community. “Now I'm pushing a new way of thinking” refers to the shift in metaphysics we’ve discussed in this class.

Lyrics

[Chorus]

What we build together

Will it last forever?

Or it's the bonds we made today?

And after its all done

and we're all far gone

will we still unite as one?

[verse 1]

I feel the higher beings are better than me

Metaphysically i am one with he

Spiritually i want to be the better me

but its really hard to be

If i can't help myself, might Aswell help those along with me

The old one would've said that's crazy

So we get up and get busy

[Chorus]

[Verse 2]

So we spent a long time building up this life

And the old ones just trying to survive

now im pushing a new way of thinking

maybe band together and get to linking

You know: building something big

You know: think about the bigger pic

You know: If the higher ones aint happy

it all gets real shitty

[Chorus] 3x
